HAND PROTECTION WITH A CONSCIENCE

**THE WORLD'S FIRST
CARBON NEUTRAL
SAFETY GLOVE RANGE!**

At Traffi, we're on a mission to reduce your hand injuries, costs, waste and carbon emissions.

Choosing the LXI range from Traffi means that you are selecting a high-quality product that is certified carbon neutral. This covers raw material, knitting, manufacturing, shipping to the UK and on to the customer delivery point.

**ZERO PLASTIC
PACKAGING**

As part of our sustainability journey, we are on a mission to remove all plastic. So far we've replaced over 500,000 poly bags with our 100% recyclable card wrap!.

TG1240

TG1240 offers great protection, due to having Nitrile built in. We issued two pairs to every person, and the fact that these can be washed whilst still on, left to dry and then used again, makes them perfect.

Martin Caddick,
Head of Support Services, Bradfords

TG3240

These gloves are a lot better than regular gloves, comfortable to wear and feel soft on hands, grip and durability is better as well.

Charanjit Singh,
Fortel

TG5240

Very good glove, easy to wash (washed Friday night ready to wear Monday- I'm still using them after 1 month of use).

Christopher Hone,
App electrician,
T. Clark

TG6240

Brilliant glove, nice fit around the wrist, top class dexterity, doesn't even feel like you are wearing a safety glove.

TG1360

Comfortable gloves with good grip and protection.

Charlie Dunn,
Space Engineering Services

TG5360

The gloves are great, really thin, and you still can use the work tablets with them on which helps for taking photos on the job. The dexterity is great as well and really helps you can wash them to get longer use out of them.

British Gas Engineer

TG7360

Excellent fit and feel, even after washing them. Far superior to other gloves.

Mark Petkovic,
Team Leader,
Network Rail

HERE'S WHAT THEY SAY...

OXFORD VIADUCT

THE PROBLEM

BAM Nuttall had to comply with the minimum standards of cut C protection as requested by their client. However, they were finding the cut C gloves very cumbersome and restrictive, making general handling activities challenging. It was also identified that there was a trend of workers removing gloves to use devices as the current products provided weren't touchscreen compatible.

THE SOLUTION

Traffi recommended the TG6240 due to the high cut resistance, dexterity, hard wearing coating and touchscreen capabilities. After trials had been carried out, it was clear that the TG6240 was the preferred glove of choice lasting double the time of the previous products, and the overall performance of the product being rated as excellent. With sustainability at the heart of BAM Nuttall, Traffi were able to support in their goal to reduce CO₂ and waste emissions with an LXT carbon neutral glove.
